Stock market returns varied in the first quarter, with international equities broadly outperforming their U.S. counterparts.

Both the U.S. Equity and Non-U.S. Equity composites underperformed their respective benchmarks in the near-term. The U.S. Equity portfolio trailed due to its smaller cap bias, while the Non-U.S. Equity portfolio trailed due to active management within emerging markets.

Fixed income markets were positive for the quarter, with investment grade bonds outperforming high yield.

The Core Fixed Income composite slightly outperformed its benchmark for the quarter and FYTD periods. The Credit Opportunities portfolio has delivered mixed results versus its benchmark, but achieved a higher total return compared to Core Fixed Income on the FYTD basis.

Past performance is no guarantee of future results.

Returns for pooled funds, e.g. mutual funds and collective investment trusts, are collected from third parties; they are not generally calculated by NEPC. Returns for separate accounts, with some exceptions, are calculated by NEPC. Returns are reported net of manager fees unless otherwise noted.

A “since inception” return, if reported, begins with the first full month after funding, although actual inception dates (e.g. the middle of a month) and the timing of cash flows are taken into account in Composite return calculations.

NEPC’s preferred data source is the plan’s custodian bank or record-keeper. If data cannot be obtained from one of the preferred data sources, data provided by investment managers may be used. Information on market indices and security characteristics is received from additional providers.
